

# MEDEA - Mediterranean practitioners' network & capacity building for effective response to emerging security challenges

Project – MEDEA - Mediterranean practitioners' network & capacity building for effective response to emerging security challenges Duration: June 2018 - June 2022

Military Science research área of IUM (Military University Institute): "Military Technology" and "Military Operations"

Research Line at CINAV – Decision Support Systems

Person responsible at CINAV – Prof. Anacleto Correia

## Aim

The MEDEA proposal aspires to contribute to the establishment of safer and more secure societies throughout the Mediterranean and Black Sea region using research and innovation as a catalyst to promote collaboration between practitioners from diverse disciplines and countries. The MEDEA project provides funding for four interrelated actions:

- **Establish and Operate the MEDEA network**, which is a multi-disciplinary network of security practitioners, with active links to policy makers and users/providers of security innovations across the M&BS countries focusing in Border Protection and other Security- and Disaster-Related tasks.
- **Engage participants in anticipatory governance on emerging security challenges** that the Mediterranean and Black Sea regions will face in the coming years.
- **Push for the "co-creation" of security technology and capabilities innovations** between practitioners and innovation suppliers, which is based upon their evaluation and prioritization on multi-criteria analysis and also linked to Human Development, Policy Making and Organizational Improvements in terms of facilitating its use by the practitioners.
- **Establish and annually update the Mediterranean Security Research and Innovation Agenda (MSRIA)** that identifies areas where security & defence research is needed and the establishment of recommendations for European Security & Defence technology investments.

## Financing

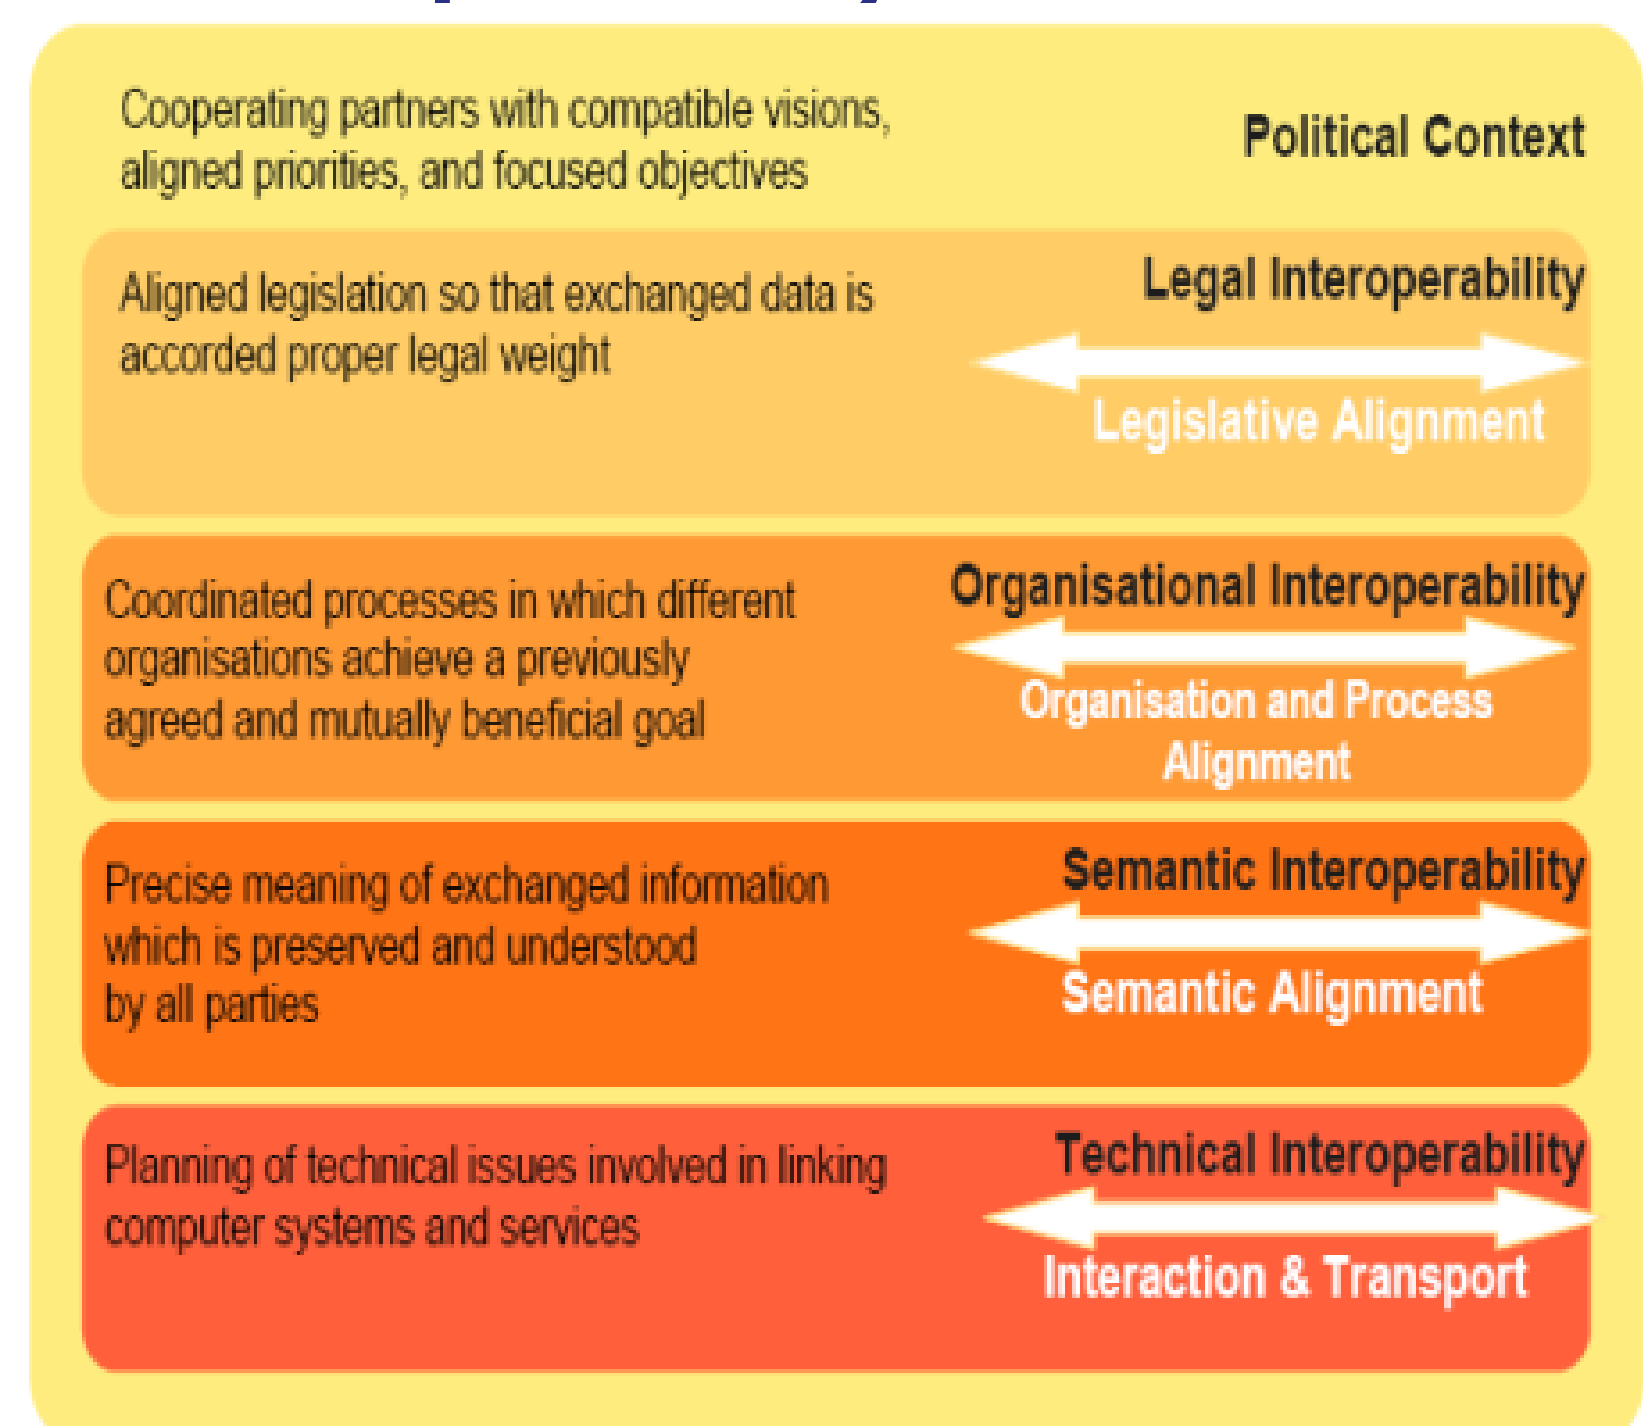

Call H2020-SEC-2016-2017. Pan European Networks of practitioners and other actors in the field of security. Geographical priority in Mediterranean Region (including the Black Sea)

## Scenario components

## MEDEA Four-layer interoperability framework

## Consortium

- 19 partners from 16 countries across Europe
