

Mediterranean practitioners' network & capacity building for effective response to emerging security challenges

MEDEA is a project that has received funding from the European Union's Horizon 2020 - Research and Innovation Framework Programme **H2020-SEC-21-GM-2016-2017**, under grant agreement no **787111**.

Additional information about the project and the consortium can be found at www.medeaproject.eu

D8.4 MEDEA 1st Project Review Report

Contractual Delivery Date: 11/2018

Actual Delivery Date: 09/01/2019

Dissemination level: Confidential

Version: 1.0

Abstract

This deliverable is the M1-M6 Project review report, which details the progress made by the MEDEA consortium in two aspects. It first outlines the performed project related activities and then it details the consortium efforts to set up and expand the practitioners' network in research and innovation, end user needs and capabilities prioritisation.

DISCLAIMER: This document contains material, which is the copyright of the **MEDEA** consortium members and the European Commission, and may not be reproduced or copied without permission, except as mandated by the European Commission grant agreement no. **787111** for reviewing and dissemination purposes.

Executive summary

This report is the first MEDEA project review report. It details all project and network activities performed in the first six months of the project. There are two main parts in this report. The first part, which reports the progress made against the DoA. This part lists the deliverables submitted and explains the status of the not yet finalised ones.

The second part lists all network related activities. MEDEA is a consortium which will evolve to a multidiscipline practitioners' network. The report details the performed activities to identify research and innovation actions of interest to network members. In the first six months, the project identified a series of innovative actions which would like to monitor their progress, and a number of practitioners' networks the MEDEA members think it will be beneficial to interact with. The interaction with the other networks will lead to synergies, collaboration and to common requirements to enhance practitioners' capabilities which apart of being identified, they should be prioritised by the actual practitioners' needs.

The last section of the report, details the activities identified up to sixth month of the project, and will be the main focus of the consortium efforts in the coming period.
